

Group 2

- **Bradwell Garanganga(Facilitator)**
- **Zwedu S**
- **Gobena, A**
- **Lucy Samvura**
- **Tambu Pasi**
- **Tiri Muhwati**
- **Emily Matingo**
- **James Pagona(rapporteur)**
- **Sheuya Z(Chair)**

QUESTION 2

- **How often are stakeholders in the agriculture and food security value chain involved in the co-designing, co-development and co-delivery process...??**

Who?

- **Key players;**
- **Ministry of Agriculture**
- **Seed and Fertilizer Companies**
- **Agricultural Research institutions**
- **Agro-processors**
- **Media**
- **Disaster Risk Management**
- **Farmers Unions**
- **Farmers**
- **Etc**

CHALLENGES

- **Most stakeholders are not often involved in the co-designing, co-development . They are mostly involved mostly in the co-delivery process. (except for a few countries e.g Malawi and Tanzania,)**
- **Our governments are not giving enough support the initiative. There is high dependence only on donor funding.**
- **Limited capacity of NMHs agencies to get stakeholders involvement in the co-designing, co-development and co-delivery process**

Recommendations

- **There need for development of national framework for climate services(NFCS) to ensure all stakeholders are involvement in the co-designing, co-development and co delivery**
- **Governments should commit to provide funding for NFCS**
- **WMO should help in facilitating funding resources to help countries to implement national frameworks e.g GCF funds National Adaption Plans(NAP) for developing countries but their implementation will not succeed without the NFCS**
- **WMO, in consultation with member countries, should give guidelines and datelines on development and the implementation of NFCS**
- **There should be a focal person at Min of Agriculture**

END
