

Knowledge management

Strategy development

The WISER programme has a responsibility to review, approve and deliver knowledge information created through the programme.

The Met Office and ACPC have developing a shared understanding of Knowledge Management

- Establishing the principles
- Stakeholder engagement
- Joint strategy development

Principles

Delivering user-led services

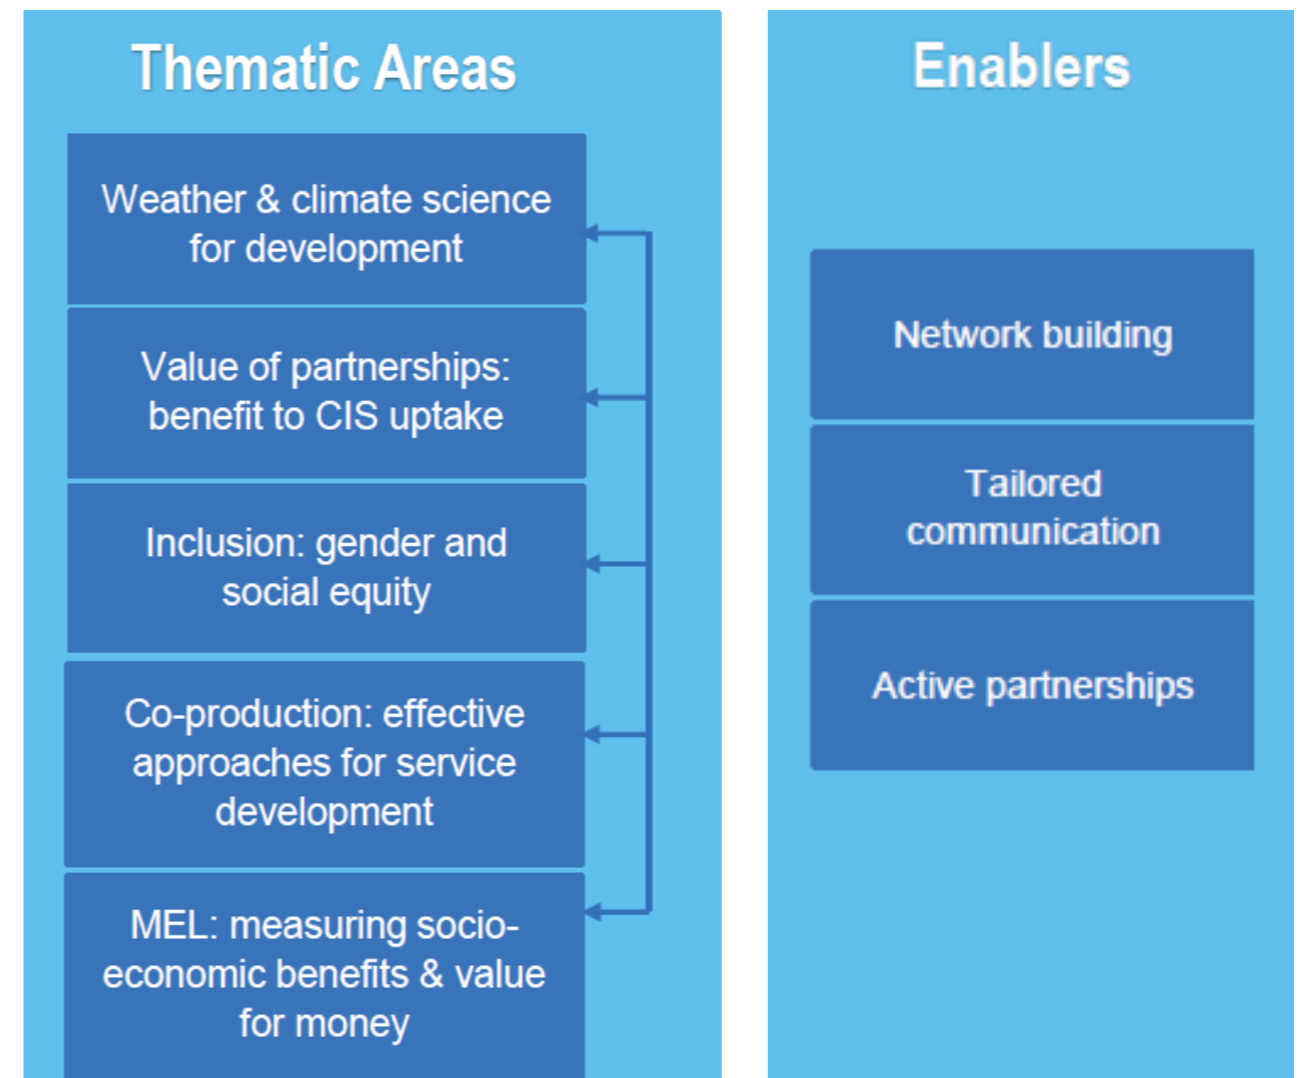

Knowledge sharing within effective networks

Value for money

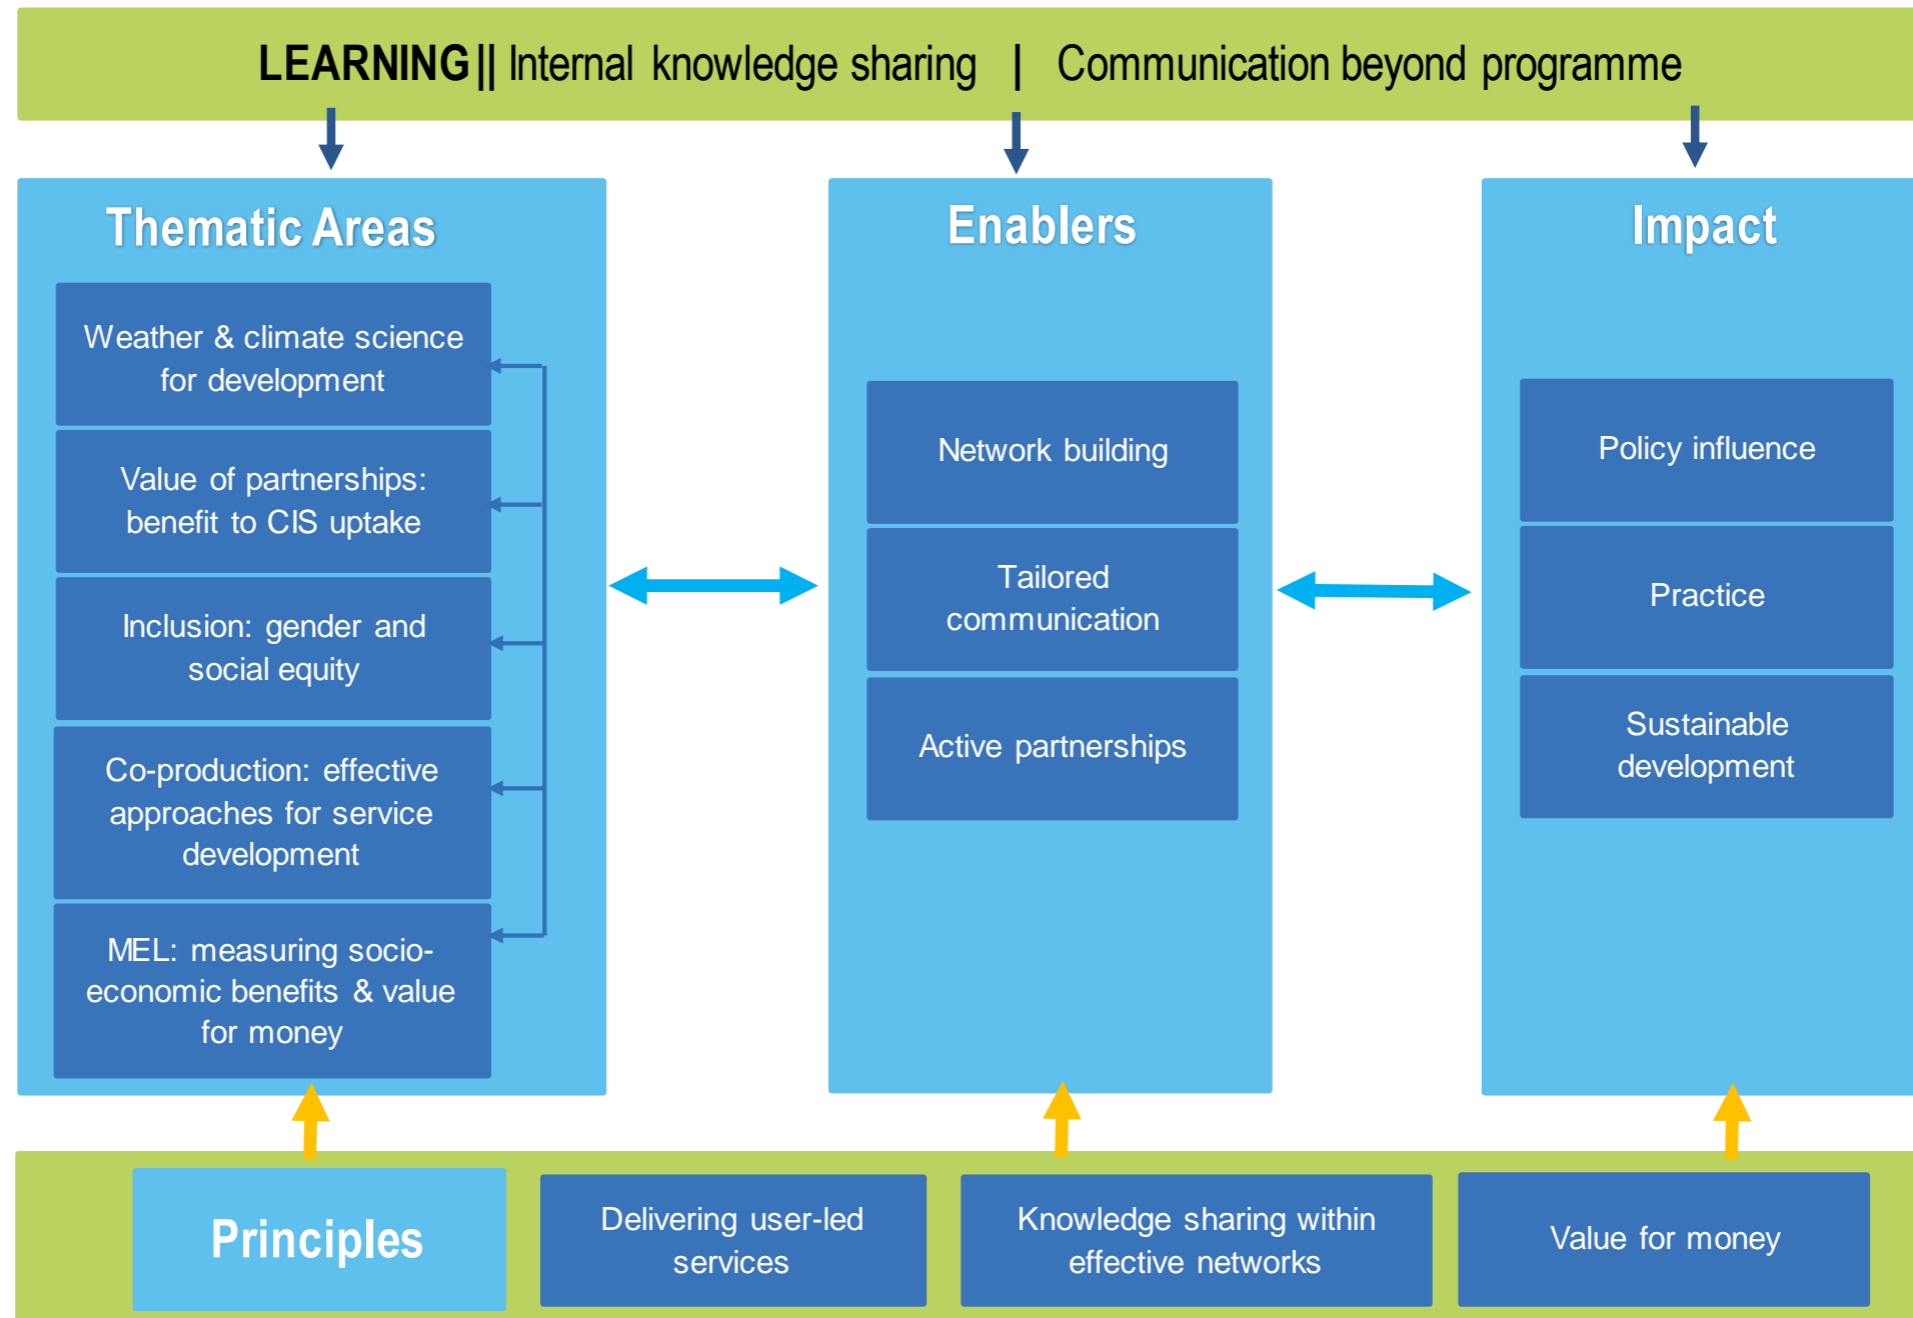

Thematic areas & enablers

- Theme development in line with the outputs of the WISER programme
- Enablers identified to ensure knowledge sharing

WISER knowledge management strategy

Knowledge to support the development of user-driven sustainable weather & climate services

Policy & Enabling Environment Component (PEEC)

Sharing developments and knowledge within the WISER programme

Communicating WISER knowledge beyond the programme

Influencing policy, practice & programmes

Network building - audiences

Tailored communication

Active partnerships

Impact
